

WHERE DOES SCIENCE LIVE?

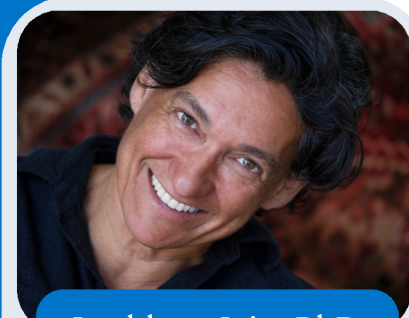

Rebridging Trust Between Science, Technology & Society (STS)

Tuesday, April 29 at 6 p.m.

Saints Tekawitha and Serra Hall, Room 215

While we are living in an era of unprecedented scientific breakthroughs, public trust in science is at an all-time low. Join us in our exploration of how understanding the social, cultural, and historical contexts of STEM – through an emerging field called Science, Technology, & Society (STS) – can pave the way to restoring trust and forging a more collaborative future.

Lochlann Jain, PhD is an award-winning author and Professor of Anthropology at Stanford University, Visiting Chair of Global Health and Social Medicine at King's College London, and a Research Affiliate at VIAD, University of Johannesburg. His work aims to unsettle some of the deeply held assumptions about objectivity that underlie the history of medical research. Jain is the author of *Injury* (Princeton UP: 2006); *Malignant: How Cancer Becomes Us* (UC Press: 2013); and a book of drawings, *Things that Art: A Graphic Menagerie of Enchanting Curiosity* (U of Toronto Press: 2019).

Lochlann Jain, PhD

Professor of Anthropology at
Stanford University

Science, technology and society (STS) is an interdisciplinary field that examines the creation, development and consequences of science and technology in their historical, cultural and social contexts.

Cosponsored by USD's Humanities Center, Department of Philosophy and Biomedical Ethics Program
